RE NOMINATIONS

The first Monday in December is nomination day, and provided more than three candidates are placed in the field, the electors of the village will be called upon a week later to elect a trio to manage municipal affairs for 1920. The JOURNAL does not know if the present Mayor, H. J. Raymer, or Councilman J. Glazebrook intend running for office again or not, but however owing to the departure of A. G. Holland, the third member of the Council, there will be a vacancy to fill.

NEW TELEPHONES

Within the next week four new phones will be added to the Mirror exchange, making 25 in the village. The new subscribers are: H. Mitchell, S. Smith, C. L. Suggett and A. W. King. In addition the new rural route No. 6 will be connected up to Mirror and the long expected will at last be a realization. No. 6 route will have as users: Edwin Ross, Henry Curr, A. C. Peterson, Owen D. Cook, J. W. Miller, J. R. Allen, L. Olsen, G. W. Bell, A. J. McDonald, Melvin Olsen and Jas. Brindle.

Five new phones have also been added to the No. 5, the names being: W. J. Paton, J. A. McMillan, Wm. S. Eedeshall, C. Wolferson, Oliver Olsen.

G. W. V. A.

The regular monthly meeting of the local branch of the G. W. V. A., was held in the new club room last Monday evening with a fairly good attendance of members. In the absence of Pres. Tinker, owing to sickness, Vice-Pres. R. M. Pym occupied the chair.

Soc. Merkley reported the receipt of the third quarter's provincial grant of \$112.50.

Comrade F. D. Brae was appointed as delegate to represent Mirror Branch at the Provincial meeting to be held in Edmonton on Dec. 9th.

Business in connection with the dance was transacted. A special meeting will be held on Friday, Nov. 28th, in the Club room.

U. F. A. Meeting

A special meeting of the U. F. A. will be held in the Town Hall, Mirror, on Saturday, Nov. 29th, at 2 p. m.

All farmers invited to make a special effort to be present. Business of special importance. Papers of incorporation are here and selling of shares will be undertaken. Matters pertaining to Political Association will be taken up. Membership for 1920 will be received and all farmers are invited to join.

F. McDonald, Jas. J. Cairns, Pres. Secy.

SCHOOL REPORT

Marks obtained in last Friday's examination in Geometry. Senior room.—Grade XI—Frankie McDodd, 73.

Grades IX and X.—Mona McDonald, 61; Jane Fell, 57; Harold Pemberton, 39; Ralph Crook, 35.

Grades VII and VIII.—James Common, 97; Carol Watson, 93; Marion Snley, 92; Janet Oldring, 90; Margaret MacLean, 88; Annie Smith, 88; Margaret Lakey, 78; Mary Common, 78; Kathleen Kirk, 70; Edna Brewster, 74; Florence Annesley, 67; Harold Oldring, 63; Harold Ray, 62; Blake Downswell, 64; Cecil Conway, 60; Bertie Jackson, 55; Tom Slife, 49.

Grade VI—Arithmetic.—Louise Stevenson, 86; Claude Marshall, 74; Norman Ray, 55; Robert Smith, 53; Dorothy Cooper, 30.

RALPH LECKELT, Teacher.

LOCAL NEWS

R. B. Birley is now driving the school van from the north.

There was small attendance at the U. F. A. meeting last Saturday afternoon. An Old Timers' Dance will be given by them on Dec. 12th.

Bunnell Bros., of Lacombe, were in town on Tuesday.

Wild ducks are still in the neighborhood, and up in the Chain Lakes district, 15 miles north-west of here, they are there in thousands. Some say this is a sign of mild weather.

L. P. Minkler has bought about sixty head of cattle from Estell Bros.

A basket ball game, box social and dance will be given by the basket ball team in the Mirror theatre on Friday, Dec. 3rd.

A most enjoyable evening was spent at the Gadsby school house last Friday evening, by the people of that neighborhood. A program of songs, recitations and music was given followed by a lunch. A. C. Walton acted as chairman.

If it's Butter you want, why get it from the Mirror branch of the Calgary Creameries, the firm that makes the butter. Best Creamery Butter at 70c a lb. FRED. C. HAZELL, manager.

Mrs. J. C. Sanderson, of Tendersley, Sask., and Mrs. Arthur Holridge, of Portage la Prairie, Man., were visiting with their brother-in-law, F. C. James, last week.

Frank Armitage was a visitor in Edmonton last week.

B. Prokos has sold his house to Geo. Bell, and the latter will move the building out to his farm, five miles south-east of here. He will do the moving as soon as the ice on the lake is strong enough to carry the weight. Mr. Bell lost everything in a fire several months ago.

W. W. and Mrs. Scott, of Bashaw, were in town on Monday last.

Xmas Will Soon Be Here

We have a host of gifts and more arriving and comprise gifts to suit every pocket. All kinds of Toys for the children.

For the Grown-Ups we have

Hand Painted China Fountain Pens
Books Silverware Xmas Perfumes
Chocolates in Boxes Xmas Stationery
Cigars in Boxes Pipes, etc.
Gramophones Kodaks
French Ivory Toilet Goods
Purses, Hand Bags, etc.
And a host of other things.

Come in and look them over

Controlling the Liquor Traffic

The most efficient method of controlling the liquor traffic with the object of eliminating the abuses and excesses which seem to be inseparable from it has long been the subject of agitation and legislation. Possibly no one question has resulted in the passage of a greater volume of legislative, the enactment of more restrictive laws, or the taking of more votes, than that of public control of the liquor in intoxicants. And notwithstanding all, we are still far from having solved the problem in a satisfactory manner.

The outbreak of the Great War, and the imperative necessity imposed upon all nations of conserving their resources in man-power, productive capacity, and food supplies, led to the enactment of measures of stronger restrictive measures than had ever before been generally acceptable to the masses of the people. Many ardent temperance reformers believed that these restrictive laws would be continued after the war, and that in a generation or two the light of the liquor traffic would be an evil of the past.

It is now quite apparent that many of these restrictive laws will cease to function with the declaration of Peace, which may be proclaimed for the British Empire before this article appears in print, and in any event cannot now be long delayed. One reform brought about by the war will, however, prove lasting, that is, the open bar with all its evils and open temptations, and its pernicious training laids, has gone never to return.

Actual experience during the war has demonstrated that existing prohibitory legislation is not as conclusively prohibitive as the authors of such laws anticipated they would be. On the contrary, violations of the law are so numerous, and are so little regarded by the average person, that a condition of things has been brought about in all these countries, which is little short of a scandal, and which is certainly detrimental to a proper respect for law and subversive of good morals.

In the United States, the people have declared for nation-wide prohibition of the sale, manufacture, importation and exportation of intoxicating liquors for beverage purposes. In Canada, on the other hand, we have no Dominion-wide law, nor at present does there seem much likelihood of such a law being passed. For one thing, the Canadian Senate has shown very clearly that it will give approval to such legislation, and the House of Commons has ever before the attitude of Quebec, which is antagonistic to an absolutely prohibitory law.

Control and restriction of the liquor traffic in Canada causes, therefore, to be a subject for provincial action, supplemented by such Federal action as assist the provinces as the provinces by vote of their people may demand.

If your tea or coffee does make you restless or nervous, try

POSTUM

This delightful cereal drink is not only wholesome and economical but is truly satisfying in its rich coffee-like flavour. It can be served to the youngest as well as oldest, for it leaves absolutely no harmful after-effects.

According to legislation passed at the recent special session of Parliament, the manufacture of liquor is prohibited, except for purposes of export, in those provinces which prohibit the sale. Furthermore, the importation of liquor into individual provinces can be made illegal if the legislature of a province acts by resolution that a plebiscite vote be taken by the Federal authorities within such province on the subject of importation, and a majority of the voters declare in favor of prohibiting such importation. But after peace is proclaimed, and until such a plebiscite is asked for and held, and a verdict favorable to prohibition rendered, the prohibition of liquor for personal use, but not for sale, will be perfectly legal in all Canadian provinces. Thus the prohibitions which have been in force under orders in council will be reinforced by the proclamation of peace. So long as importation into a province is legal, it is manifestly impossible for any provincial legislature or government to enforce prohibition of the liquor traffic. It is the sale of the liquor, but that is all. And so long as importation is legally permitted existing abuses against which a large section of the people are complaining will continue. And at the best it will not be impossible to stop the importation of liquor from six months to a year.

When such a plebiscite vote is eventually held in any province, and if the popular verdict should be to permit importation, then the provincial authorities will have to seriously consider whether it would not be better to provide for some form of regulated and controlled sale within the province, rather than have the door left wide open to indiscriminate individual importation of liquor in unlimited quantities. Should the people of a province declare in favor of permitting importation, most thoughtful temperance advocates believe that some form of government dispensary based on the mail order system, and patterned somewhat after the system which at one time was in vogue in Saskatchewan, should be established.

On the other hand, if the people declare against importation, then the utmost care must be exercised in the drafting of the most drastic kind of provincial laws to prevent a repetition of abuses which are now unfortunate. Whenever the nature of the law enacted, they must have back of them the force of a strong public opinion in order to prove effective and beneficial. In the last analysis it is the people who make the laws, and unless they have the support of the people it will not be observed and cannot be enforced.

Kill the Germs of Catarrh

By Acting To-day You Can Quickly Avoid Catarrh and Avoid Bronchitis, Per-haps Consumption

Most Agreeable and Sure Cure for Catarrh. Which Cures Every Curable Case

Catarrh is a disease especially common in those chronic cases where colds drop down the throat, stiffen the stomach, and pollute the breath. When the nostrils are stuffed, only a few breaths through the inhaler are needed to clear the passages, and where there is coughing and sore bronchial tubes, the soothing, healing properties of Catarrhine act almost as magic.

Once you stop taking medicine, the stomach and get the healing oils and pure balsams of Catarrhine at work you can be sure of quick and lasting cure for nose colds, catarrh, weak lungs, bronchitis, and speaker's sore throat.

The complete \$1.00 Outfit of Catarrhine is sufficient for two months' treatment, and is guaranteed. Smaller size, 50c, at all dealers, or the Catarrhine Co., Kingston, Ont.

It's surprising how many otherwise sensibly inclined men believe in signs and omens.

A keen blade for every shave

If there's any pleasure to shaving, you get it in an AutoStrop Razor. First, because it always a sharp blade ready for use—a few turns on the strap brings it back to its professional keenness. Secondly, because there's no fusing with parts after shaving. And thirdly, because a simple adjustment makes it possible for you to shave as closely or as lightly as you wish.

From first to last, sharpening, shaving and cleaning, you never need to touch the blade from the razor.

Sir Francis Drake's Sword
At a sale held in Inverness recently the sword of Sir Francis Drake was disposed of. This weapon is considered to be the one which Queen Elizabeth presented to Drake on the occasion of his being knighted after his voyage round the world. The sword realized 240 guineas.

Hope for the Chronic Dyspeptic.
Through lack of consideration of the body's needs, many persons allow disorders of the digestive apparatus to endure until they become chronic, filling days and nights with suffering. To these, a course of Farnec's Vegetable Pills is recommended as a sure and speedy way to regain health. Pills are especially recommended to combat dyspepsia and the many ills that follow in its train, and they are successful always.

The Canadian Wheat Crop

Is Estimated by the Government at 193,000,000 Bushels

The Canadian wheat crop for 1919-20 is estimated by the government at 193,000,000 bushels, or about 4,000,000 more than that of last year. According to authorities on agriculture, Canada requires for her own needs approximately 40,000,000 bushels of wheat, and for feeding about 35,000,000, making a total of 75,000,000 bushels.

Canada's exportable wheat in 1919-20 will therefore be about 118,000,000 bushels, as compared with 103,611,000 in the last twelve months, or about 10,000,000 bushels. This will allow of a few million bushels for the carry-over stock on August 1, 1920.

The production of wheat in Europe, on the other hand, is down, and Canada's prospect of a good market is very bright. If credits can be satisfactorily arranged, there is no reason why Canada should not practically sell out everything. Great Britain and Ireland will require at least 180,000,000 bushels, or about 70,000,000 more than Canada has to export.

Look out for dark days when the weather man predicts light rains.

Warts will render the prettiest hands unattractive. Clear the excrescences away by using Hottelway's Corn Cure, which acts thoroughly and painlessly.

Western Canada's 1919 Crop
While exact figures are not yet obtainable, wheat authorities now seem to be conforming to the general opinion that Canada's total yield of wheat this year will be 248,000,000 bushels, as compared with 183,000,000 bushels last year. Of this crop, the share of the Western Provinces is 166,000,000 bushels, or over two-thirds of the total yield.

In addition, one of the most reliable sources in Canada has estimated that the West will produce 227,000,000 bushels of oats, 97,000,000 bushels of barley, 6,000,000 bushels of flax, and over 2,000,000 bushels of rye.

Suspect not a friend's word, but rather his meaning.

Community Interest

The Teacher an Important Factor in Community Life

"What does the community expect of the teacher?" To this question there is but one answer, "Everything," according to Col. T. E. Partridge, principal of Regina Normal school, who delivered the principal address before the teachers and trustees of Saskatchewan district recently. He urged strongly upon the teachers the necessity for getting the entire community interested in the school, by use of libraries, parent teacher associations, and other practical measures.

Other addresses, dealing with methods of teaching, were delivered by J. E. Coombes, inspector of the district; Dr. G. M. Weir, principal of Saskatoon Normal; A. S. Ross, and others.

"SYRUP OF FIGS"

CHILD'S LAXATIVE

Look at tongue! Remove poison from little stomach, liver and bowels

Accept "California" Syrup of Figs—look for the name California on the package, then you are sure your child is having the best and most reliable laxative for children. It is the little stomach, liver and bowels. They love its delicious fruit taste. Full directions for child's dose on each bottle. Give without fear. Mother! You must try "California."

Let Bygones be Bygones
"By the way, George, what shall we give Mabel for a wedding present? She gave us that plain upholstered chair in the attic, you know."

"I don't think we'd better send her anything dear, why not let bygones be bygones."

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effects while the child is free from loss of appetite. In feverish conditions they will be found useful and they will serve to allay pain and griping in the stomach, from which children so often suffer.

A man may not be a coward because he is afraid of a woman.

Minard's Liniment Cures Colds, &c.

Telegraph Service Resumed

The general telegraphic intercourse between Germany and France, inclusive of Algeria and Tunis, has been reopened. Previously, only commercial wires in intelligible German, English, French, Italian and Japanese are passed.

The censorship on telegrams in Germany has been raised. Press telegrams from Germany and Great Britain are again allowed, and code telegrams from Germany to Holland are permitted if reliable information on their contents is given if desired.

Minard's Liniment Cures Garget in Cows

A scientist says that cholera germ like a comma. Possibly, but when they get into a man's system they are apt to put the final period to his existence.

A young widow hasn't much use for a man who attempts to kiss her and fails.

Poverty is the mother of many of-forts.

Iron Pyrites and Clay Deposits

Interest Shown by Capitalists in Development of Saskatchewan's Natural Resources

Immense deposits of high grade brick-making clay have been discovered at the Elbow, according to Andrews & Cruikshank, analytical and consulting chemists, Regina, who recently analyzed samples brought in by farmers of the Elbow district. It has been further discovered that a very valuable deposit of iron pyrites underlies the clay, so that the men who file on these claims and succeed in developing the discoveries have a double-barrelled source of revenue. Iron pyrites furnish sulphuric acid, which is a basic acid in chemistry and is worth \$35 a ton, while a valuable by-product is obtained in rendering. Claims extending over a quarter section have been filed on and an endeavor is being made to interest capital, says the Regina Leader.

A few days before the discovery of the iron pyrites was made, an Old Country capitalist, who manufactures sulphuric acid in England, was in the office of Andrews & Cruikshank and said that he would be willing to manufacture sulphuric acid here if he could locate a deposit of iron pyrites. Efforts are being made to get in touch with him.

Messrs. Andrews & Cruikshank informed The Leader that all indications point to a great movement by Old Country capital in the development of the natural resources of the West, and that the next two or three years should see some important investments in directions which up till now have been entirely neglected in this province.

HEALTH FOR THE BABY

The baby of today is the man or woman of tomorrow. Thus the success of the future man or woman depends upon the baby's present welfare. If the baby is sickly and ill-nourished, it is not to be expected that he will grow into a strong, active man who will hold his own in the business world a few years hence. Mother, it is a duty you owe to your future to keep your little one well nourished. Baby's Own Tablets are kept in the house. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, and thus insure healthy and strong babies.

Concerning them Mrs. W. Orser, Eglungton, Ont., writes: "I have a fine healthy boy three years, and have used Baby's Own Tablets for him ever since he was a small baby. I earnestly think them a splendid 'revelation.' The Tablets are sold by medicine dealers, or by mail at 25 cents per box from Dr. Williams' Medicine Co., Brockville, Ont."

Corns are proof that nature is capable of small, mean things.

Many a fisherman waits with bated breath.

How strange the old-time pictures of sport would look today—baseball teams loafing at least half-dozen sets of whiskey-fall bearded criketers—champions of the skill with their chin concealed.

Today the athlete knows the importance of the well-shaven chin. He is conscious that he is most keen when he is well-groomed—just as is the business man and the soldier.

For men who love outdoor life and sports, men of wide minds and active bodies, we have designed a Gillette Safety Razor with an extra stocky handle—the "Bulldog" Gillette, shown to the left.

Not that the Gillette needs a sturdy grasp. A light touch, with the angle stroke, removes the most stubborn beard with surprising comfort.

But there is a certain appeal in the thicker handle of the "Bulldog." Ask to see this special set and appreciate the point for yourself.

The case, you will notice, is almost as compact as the famous Pocket Edition Gillette, and the price is the same—\$5.00. Sold by all dealers catering to men's needs.

Are Your Bowels Stagnant? Have You Indigestion?

When a Quarter Will Buy You a Guaranteed Remedy, Why Not Use It Today?

Many a person carries around in their system a cesspool composed of half-digested, putrid, decaying food that the overloaded stomach can't get rid of because of constipation. It wonder what ailments, blood rashes, headaches and rheumatism are common. No doctor ever known to DR. HAMILTON'S PILLS ON MANDRAKE AND RUSH. Taken at night, you'll feel next morning. It flushes out the system, sweetens and tones the stomach, improves digestion, filters and purifies the blood, restores lost constitution, gives vim, buoyancy and robust good health to young and old. To look, feel and always be at your best, use DR. HAMILTON'S PILLS regularly, 25c per box.

Prosperity on a Quarter Section

More Real Living Out of Life on the Smaller Farm

Can a man farm and make money on 160 acres of D. R. Baldwin, of Kent Canada? Dr. I. E. Baldwin, of Kingsland, answers "Yes," and he is speaking from experience. Before coming to Saskatchewan in 1906, and bringing up his homestead in the Kingsland district, tributary to the thriving city of Saskatoon, he had pioneered in four states in the Union, his parents moving from Ohio, where he was born, to Iowa, when he was a small child. Later he homesteaded in Nebraska, near Omaha City, and was a pioneer settler in the state of Kansas, where he lived sixteen years, and Oklahoma, where he homesteaded in 1895. After about ten years in Oklahoma, he came to the Canadian West and began again on a homestead in 1906.

Here he has prospered, though he has never farmed more than 160 acres (1/4 land), and he has constantly refused to follow the "big game" neighbors to increase the size of his farm. He believes he can get more real living out of life on the smaller farm. His policy is "always in his business, and not let it run him." He is finding the operation of what is known as a "small farm" a pleasure and a profit in itself. Probably his previous pioneering experience helped him to form this opinion.

Now he farms a quarter section and makes more money than he then many a farmer with three or four times as large an acreage, he told a representative of the Northwest Farmer, at Winnipeg, recently.

"I never went into grain farming, but made my money out of cattle, dogs, horses and potatoes. I follow the rotation of barley, wheat and oats without any summer fallow whatever. I plow for all my grain crops and plow it again in the spring, which, in addition to plowing of manure, has made the summer fallow absolutely unnecessary for me to practice. Instead of sowing rye on a separate piece of land, I intend to henceforth sow it with the oat crop when the oats are two inches high. This I have done, and has been tried in Manitoba and has proven very successful in certain parts. All the grain is used for stock purposes, and it is from that source that my revenue must be made to come."

The summer feed for sixteen head of cattle is sixty acres of pasture, and in the fall they run on the stubble and on winter rye, which is usually sown about the first of August. During the winter they run out in the day time and are stabled at

night, feeding on straw, hay, sheep manure, and usually a few turnips. In the spring, winter rye offers early pasture, which they use until May 1, at which time they are taken off and the rye allowed to ripen to be cut for a crop.

"My hog proposition is operated on ten-acre hog lot, surrounded by woods, and 26 inches high, about which are three barbed wires. I usually plan on raising two litters a year, and litter coming in April, and one in September. I find that ten acres of hog pasture for five Duroc sows and their litters is sufficient to make a great reduction in the cost of rearing litters; in fact, furnishing all the pasture they want to eat. The pasture consists of bromus grass, a little alfalfa, oats and wheat mixed, and rye. I have tried barley, but find it kills out more cattle than oats and wheat. The bromus grass is good in the early spring and late fall. The rye is usually sown in April, and along with the grain pasture furnishes good summer feed. The hog proposition is a very simple one. They get oats and barley chop with more hay than oats (wards fattening time, and they run in this hog pasture, having access to whichever pasture they prefer, there being no cross fences. The hog lot is safe and cheap, but has proven better than any elaborate hog house I could put up. It consists of eight posts set in the ground to form a rectangle eight by eight feet with a frame arranged over the top and straw threshed over the entire framework. A pig run three feet wide extends out a considerable distance from this pen, over which straw is also placed. This shelter will winter from 30 to 60 hogs. A short distance away I have a hog feeding house, twelve feet by twelve feet, in which the hogs are fed in winter."

He has a good income from potatoes. With this crop he has always been successful in obtaining large yields. He plants six acres to potatoes every season, and he has always had a crop of from 300 to 525 bushels. For all of his big potatoes, he has found a ready market at never less than 60 cents a bushel, while he has received as high as \$2.50 a bushel.

His 160 acres are divided into 60 acres of pasture, two acres of a pig lot, nine acres of hogs, ten acres of hedges, and 85 acres in crops, consisting of 35 acres of oats, 2 acres of barley, nine acres of rye, and six acres of potatoes. Surrounding his buildings is quite an extensive hedge consisting of 20 rows of trees. The varieties are fox elders, ash, cottonwood, willow, caragana, and evergreens, planted four feet each way. With the exception of the evergreens, they are now from eight to 24 feet in height, forming a fine protection which the owner would not part with for a great deal of money.

It is not difficult to figure that Mr. Baldwin is deriving a very satisfactory income from his 160-acre farm. Since the day that he arrived in Saskatchewan, practically penniless, in 1906, he has broken the whole of his land, fenced his farm for \$4,000, and has acquired a fine herd of cattle, besides a large number of horses and ponies, and is considered among his neighbors as a prosperous farmer.

Debt Penalized in Siam—People in Siam are cautious about getting into debt. When a debtor is three months in arrears he can be seized by the creditor and compelled to work out his indebtedness. Should a debtor run away, his father, his wife or his children may be held in slavery until the debt is cashed.

It's easy to find fault when it's

Ladies Perfume Your Skin With Cuticura Talcum

Antiseptic, prophylactic, deodorizing, fragrant and refreshing. Cuticura Talcum is an ideal face, skin, baby and dusting powder. Convenient and economical; takes the place of other perfumes for the person. A few grains suffices. One of the indispensable Cuticura Toilet Ties for keeping the skin pure and sweet.

Cuticura Soap, Cuticura Cream, Cuticura Ointment, Cuticura Toilet Ties, Cuticura Talcum, Cuticura Face Powder, Cuticura Baby Powder, Cuticura Dusting Powder, Cuticura Deodorant, Cuticura Antiseptic, Cuticura Prophylactic, Cuticura Deodorizing, Cuticura Fragrant and Refreshing.

For full particulars, see advertisement in "The Journal, Mirror, Alberta," or write to Cuticura, Boston, U.S.A.

The Land Of Opportunity

Saskatchewan Is the Greatest Wheat Producing Province of the Dominion

"The Province of Saskatchewan: Its Development and Opportunities" is the inviting title of a comprehensive report that has been issued by the department of the interior through its natural resources intelligence branch, Ottawa.

The object of the department in the publication of this latest addition to its numerous maps and reports is to familiarize prospective settlers, investors and capitalists with the agricultural, mineral, forest and water power resources of the province. The information has been compiled from numerous authentic sources and supplemented by interesting facts and figures with respect to transportation, education facilities, towns, soil, etc.

Embracing as it does the heart of the province and a large share of its choicest lands, Saskatchewan has developed within a comparatively short period into the greatest wheat producing province of this Dominion.

The march of progress is still in full swing, and the opportunity to share in the great growth that should be witnessed in the future is open to all who may desire to call in their lot with the people of a province which is greater in resources than any country in Europe, with one exception.

To Lift The Lusitania

New Method of Raising Sunk Vessels Has Met With Good Success

Calcutta is the mother of invention. Owing to the large number of valuable ships sunk by submarines in comparatively shallow water near the British Isles, special attention has lately been given by British inventors to the improvement of salvage methods. The present system involves the towing of lighters to the scene of operations, which make the process so costly and hazardous that in many cases the venture is neither feasible nor profitable.

According to the Halifax Chronicle, an entirely new method was recently tried, with conspicuous success, on a vessel which had been sunk by enemy action off the coast of Scotland. The salvage boat had on board two flexible pontoons made of special canvas and cable, and each weighing about one ton. These pontoons were fastened to the hull of the sunken vessel and inflated with compressed air, raising the vessel slowly and permitting it to be towed into shallow water for beaching. Each pontoon when inflated is capable of lifting 100 tons, and the makers are now count of being able to make similar pontoons with a lifting capacity of 200, 300 and even 500 tons.

By multiplying the number of large pontoons, vessels of any size can be raised, provided that divers can reach the hull in order to fix the shackles. There is, it is contended, a clear possibility of raising the "Lusitania." A bath of 60 pontoons, each 100 tons lifting capacity, would be sufficient, it is claimed, to lift the vessel so that it could be towed into shallow water, where it could be rapidly pumped out, and refloated at high tide.

Vitality of Snails—Snails have remarkable vitality. A naturalist once received some specimens after they had appeared here dead for fifteen years, and one that had been glued to a card in a museum returned to life after being submerged in water.

Dead men tell no tales, but they sometimes leave large quantities of unpublished manuscript.

Demountable Ships

British Capital Engaged in Manufacture From Douglas Fir

Announcement was made at Seattle that the Furber Lumber Company, a New York concern controlled by British capital, this winter will ship 50,000,000 feet of Douglas fir from Seattle to points in the British Empire in the form of demountable ships.

About 500,000 feet of timber will be used in the hulls of the ships. When they reach their destinations, these hulls will be dismantled and delivered as lumber. The hulls and cargo of each ship will represent about 10,000,000 feet, it was said.

Admiral Robert Peary's famous old exploring ship, the Roosevelt, now owned by the U.S. Navy, will tow the first of the demountable ships to Australia.

It's a shame the way some young fellows break into the game again and don't give the maida a chance.

Some spinners advance step by step until they become spinners.

KNOCKS OUT PAIN

THE FIRST ROUND

Comforting relief from pain makes Sloan's the World's Liniment

"This famous reliever of rheumatic aches, soreness, stiffness, painful sprains, neuralgic pains, and most other external twinges that humanity suffers from, enjoys its great sales because it practically never fails to bring speedy, comforting relief. Always ready to use, it takes little time to penetrate and without rubbing and produces results. Clean, refreshing, and of long stores. 35c, 70c, 85c. Made in Canada."

Sloan's Liniment
Keeps It Healthy

Oil In Alberta

Imperial Oil Co. Ready to Spend Big Sum on Sinking Oil Wells

Speaking to a reporter in Calgary, Alberta, a few days ago, Mr. Alex. McQueen, vice-president of the Imperial company, said:

"We are prepared to spend, if necessary, \$50,000 on every well we start, in order to prove the existence, or non-existence, of oil in Alberta."

"Without a doubt a large refinery will be built at some central point in Alberta, should the company's efforts to discover a large oil field be successful. A refinery of considerable size is now in operation at Regina, and this will possibly be duplicated in Alberta."

The Imperial Oil Company is preparing to drill five wells in various parts of the province, including the Car, Cardston and Nanton districts.

You may not be able to do great things, but you can at least try to do the small things in a great way.

Only a sober man should attempt to walk a tight rope.

When the condition of the liver is neglected, biliousness seems to become chronic and recurs every two or three weeks, with severe sick headaches.

"I Cannot Go"

BILIOUS headache spoils many an expected enjoyment.

Making Farms

Reclamation of Several Townships Acres of Swamp Lands Near Golden, B.C.

Work on the reclamation of several thousand acres of acres of swamp lands in the Columbia Valley, near Golden, B.C., will in all likelihood commence early next spring. An inspection of the proposed work is now being made by Senator B. C. Frowde, of Prince Edward Island, who is vice-president of the Golden-Vine demerol, a company capitalized at \$2,000,000 for the purpose of acquiring and reclaiming the lands in question.

Senator Frowde made a close examination of the lands between Golden and a point fifteen miles to the south, and was favorably impressed by their fertility. He expressed himself as being confident of the success of the proposed undertaking.

The company proposes to divide the lands into fifty-acre tracts, and Senator Frowde estimates that eight hundred families will be settled upon them. Figuring from the average Canadian family of six persons, this would mean an addition of some thousand to the population of the district.

In 1912, \$40,000 was available in England for the purpose of financing the preliminary operations of the company, but the British treasury restriction has now been removed.

The season for lemon never ends.

GIRLS! DRAW A MOIST CLOTH THROUGH HAIR

Let "Danderine" save your hair and double its beauty

Oh, girls, such an abundance of thick, heavy, invigorated hair is a perfect mass of wavy, silky hair, gloriously bright, and so easy to manage.

Just moisten a cloth with a little Danderine, and carefully draw it through your hair, taking one small tress at a time. It will remove all dirt, excess oil and grease, but your hair is not left brittle, dry, brittle or faded. It is charmingly soft, with glossy, golden gleams and tints and color are again in your hair.

"Danderine" is a tonic-beautifier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get delightful results for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on bottle.

Brotherhood Between Men

Country Needing Some Great Revival of Civic Spirit

The Bishop of Birmingham writes in a recent diocesan letter: "Our country is at the present time needing some great revival of civic spirit, and the church must not be negligent of its duty in seeing to it that the will of God becomes the basis of Britain's future policy. I am bold to say that brotherhood between men, which is the very essence of Christianity, will heal all the diseases now existing in the body corporate. We want that brotherhood right the way through between rich and poor; between the various religious bodies in the country, and gradually but surely between the members of the earth. Let us establish it at home, and we shall then greatly influence the world as a whole. I am not afraid of the working classes in this matter. If we in Birmingham read with any care the accounts of the conference of the Industrial League in this city, we must have been struck with the great capacity and the great idealism in those workers gathered from all parts of our land. They were the leaders of, at any rate, a great section of the employers and employed of Great Britain. The more struck was considerably less concerned, and I am quite certain that if these men can only get hold of the rank and file of their own class, they will have their own more regarded as something of which a man need not be ashamed."

THURSDAY, NOV. 20, 1919

\$16,000 SUBSCRIBED

The Victory Loan campaign
came to an end last Saturday
night, and although Mirror and
district failed to reach the pre-
vious year's record in the way
of subscriptions, a fair amount
was subscribed. Up to within
two days before the final day,
the amount subscribed was
about \$6,000, all in voluntary
loans, but on Friday and Sat-
urday, E. E. Heagle and N.
Spiceo got on the canvassing
end of the job and \$16,000 was
the amount raised. By far the
most of this was raised by the
citizens of Mirror, very little
coming in from the surround-
ing country. It is to be regret-
ted that the farmers were not
canvassed, as no doubt a great
many would have taken bonds
had they been approached.

CLASS CHANGES

Owing to the large attend-
ance of pupils in the interme-
diate and junior rooms of the
Mirror School, the Inspector
was requested to visit here, and
the following is an extract
from the report of F. C. Buch-
anan, B. A., on his visit on the
6th and 7th of November last:
"The total enrollment of the
school on the above dates was
117 pupils. This is 19 more
than in the Spring. There were
91 pupils in attendance, the
majority of those absent being
from the primary room. I
would not recommend the op-
ening of the fourth room at the
present time. I have sugges-
ted to the principal that Grade
VI be placed in his room and
that four pupils in Grade II be
promoted from the primary to
the intermediate room. This
will improve the overcrowding
of the two lower rooms."

The above recommendations
have been carried out.

The Hidden Chart

Publicity on Sixth Episode

Hardwick and Thelma Martin
proceed along the old mine-
tunnel, the entrance to which has
been blocked by an explosion
set off by Francesco and his
band and finally see a ray of
daylight above them. It is par-
tially choked air shaft leading
to the surface and by the aid of
broken timbers along its sides
they climb to the open again.
It is morning by this time and
as Hardwick and Thelma reach
the ranch they find that a party

of cowboys is about to go in
search of them. They explain
their absence by saying they had
gone for a night ride. Thelma
decides that the best place to
conceal the map and papers is in
their original hiding place. She
hides the map and papers in the
paralytic, is apparently as-
saulted and replaces them. Nurd-
yke, however, has feigned sleep
and really sees her act. Mean-
time Tough Mackenzie, Martin's
superintendent has decided that
he wants to marry Thelma and
he goes to Martin and insists
he force Thelma to consent to
a wedding. A detachment of
soldiers from Fort Jackson arrive
at the ranch and the Ser-
geant in charge informs Hard-
wick that he is under arrest as
a deserter.

The "Terror of the Range"
will be shown at the Mirror
Theatre on Saturday evening,
Nov. 28th.

LOCAL AND PERSONAL NEWS

Several cases of typhoid fever
are reported in town.

Bob. Herniman and Fred.
Crook have bought a "Jack"
from Bill Crook and will keep
this prize animal in Mirror for
next year.

James Mundy, a former resi-
dent of Ladue, but latterly liv-
ing in Edmonton, died sudden-
ly while engaged in adjusting
a claim for the Standard Trusts
Company, in the Hay Lakes
district. Deceased was sixty-
six years of age. A son, John,
was engaged some years ago,
in the office of the Daysland
Press and afterwards started a
paper at Bashaw, lately return-
ing from service overseas. —
Daysland Press.

A. R. Hopkins, Haynes, was
in town for a few days this week.

The officers and teachers of
the Mirror Sunday School held
a meeting in the Methodist
church on Tuesday evening last
to arrange for a Xmas Tree.
Committees were appointed
and the necessary preparations
will commence at an early date.

G. A. Dowswell, of Regina,
Sask., and Bert Dowswell, of
Big Valley, Alberta, are visit-
ing with their brother Fred. Dow-
swell. We are pleased to state
that the latter is making favor-
able progress towards recovery.

NOTICE

Village of Mirror

Public Notice is hereby given that
a meeting of the electors of the Vil-
lage of Mirror, will be held at the
Town Hall on the First Day of Decem-
ber, 1919, from eight o'clock p. m.,
until ten o'clock p. m., of the said
day, for the purpose of nominating
candidates for councillors for the said
village for the ensuing year.
Dated under my hand at Mirror,
this 21st day of November, A.D. 1919.
GRACE K. TILLEY,
Returning Officer.

LOCAL NEWS

Miss Dorothy Dowsewell went home from Alia for a few days.

F. Mitchell held a complaint of assault against H. Hornby and the case came up before H. J. Raymer, J.P., on Wednesday. The defendant pleaded guilty and was sentenced to 60 days with hard labour in Ft. Saskatchewan.

Jang Bros. have bought the Lincoln Cafe from Nip Chong and are now in possession.

On Monday evening last the boys of the Intermediate class of the Mirror Methodist S.S. met at the home of Harold Orling to bid farewell to Leland Washington, a member of the class, and who left Mirror on Wednesday. The evening was spent in a social manner. At the close the boys gathered around the gift of the evening and "Auld Lang Syne." On behalf of the members of the class, Blake Dowsewell handed Leland a book, in which each boy had previously written his name and which also bore the stamp of the Mirror Sunday School.

Anyone interested in Northern Alberta, may secure a copy of our new map, just issued, upon application to the Superintendent, Natural Resources Intelligence Branch, Department of the Interior, Ottawa.

THESE TOURS ARE INTERESTING

North Pacific Coast and California resorts are becoming more popular each year with residents of Western Canada who seek haven for two or three months during the extreme weather the prairie country inherits because of its geographical situation. There are also those who have leisure to make the trip for a shorter period to indulge in the pastimes afforded, or bask in the sunshine of these "sunny climes" this season.

The Grand Trunk Pacific Railway and steamship lines have formulated a series of tours at fares that we submit are attractive. By this route you enjoy the finest scenery of the Canadian Rockies and 700-mile Ocean voyage through protected waters of the famous "Inside Channel," a water trip that is not excelled for scenic beauty in America. The steamships are the finest fastest in the North Pacific regular trade - all outside state-rooms, hot and cold running water in each room, electric light throughout, and are completely equipped with modern wireless telegraph system. Meals and berth are included without extra charge while on board ship from Prince Rupert to Vancouver, Victoria or Seattle.

If you are contemplating a trip, we will be pleased to arrange a complete itinerary that will interest you, at attractive fares.

Apply to any Agent of the Grand Trunk Pacific Railway, or write to Mr. W. E. Dupre, General Passenger Agent, Winnipeg.

To Advertisers

THE JOURNAL requests that all regular advertisers have change of ads. in the hands of the printer, not later than Monday evening of each week.

Street Traffic in Old Time London.
On Jan. 18, 1885, an attempt was made to solve the problem of London traffic by restricting the number of hackney coaches. Charles Lloyd, a famous coachman, issued a proclamation setting out that "hackney coaches are not only a great nuisance to the public, but they are also a danger to the public, and the streets of London are so choked with them that it is impossible to get through them."

At the same time, the streets of London were so choked with them that it was impossible to get through them. The streets were so choked with them that it was impossible to get through them.

An Error in Geography.
On one occasion the British lost a point in their war with Russia by reason of an error in their geography. This was when Commander Elliot had succeeded in blockading the Russian coast of Siberia. The Russian fleet was in the Gulf of Alaska, and the British fleet was in the Gulf of Alaska. The British fleet was in the Gulf of Alaska, and the Russian fleet was in the Gulf of Alaska.

Dispositive Marvel.
An Eskimo has been found and no very unusual Eskimo at that - who eats what he can get it, four pounds of boiled meat per day. When an Eskimo can get all he wants to eat he makes a business of it. He doesn't turn it in the refrigerator, but in his stomach.

Yet the Eskimo is a healthy creature, peculiarly free from digestive disorders. A Copenhagen doctor has a subject who is a patient on a "case," but is as healthy as a horse. He is a patient on a "case," but is as healthy as a horse.

Orange Blossoms.
Much uncertainty exists as to why the orange blossom has been so much eaten by brides. But a general opinion seems to be that it was adopted as an emblem of chastity. According to a authorities, the practice has been derived from the fact that the orange blossom is a symbol of a pure heart, and is a symbol of a pure heart.

Job Training.
Captain Lord Amundsen, the Norwegian who put the south pole on the map, was born in Norway. He was born in Norway, and he was born in Norway.

Japanese Birthday Feast.
In Japan no notice is taken of the actual anniversary of a birth, but every one adds a year to his or her age on the birthday. A birthday festival which occurs either late in January or at the beginning of February.

What Men Know.
"My dear," remarked Jones, who had just finished reading a book on "The Wonders of Nature," "this really is a remarkable work. Nature is marvelous. I have never read a book like this. It makes me think how puny we are."

Law of Falling Bodies.
A falling body having fallen during one exact second falls 16.1 feet. At the precise end of the second it has acquired a specific velocity of 32.2 feet per second. This velocity it has acquired at the end of the second.

Beyond the Horizon.

Japan Saved Himself.

A little dog, unknown and found in the streets and taken to the pound. He was an affectionate animal and was greatly endeared himself to all about the place. They called him Chum and he joyfully responded whenever his name was spoken. As the day passed other poor, homeless dogs were put to death. Finally came Chum's last day of grace, and no one had come to claim him. The next morning dawned, and the man who was to kill Chum carried him into the yard. Chum whined and begged his life, but to no avail. The man then said: "Well Chum, your time has come. You'd better say your prayers." Immediately the little dog bowed, and Chum said his prayers. As the little body was still in this attitude of reverence a step was heard. The attendant looked up and saw the superintendent standing there. There were tears in the eyes of each Chum is still living, but instead of being somebody's dog he is now everybody's.

Waves and Their Uses.
Waves are used on the ocean and in the air. They are used in the air, and they are used in the air.

JAPANESE MONEY.

Yens, Senes and Rins Complete Their Simple Currency System.
The Japanese currency system is very simple and is based upon a gold basis. The unit of value is a yen. This equals 100 cents in gold, according to our United States value. One yen is divided into 100 sen. Each of the latter is worth just one half of an American cent. The Japanese coin is the equivalent of 10 rin, and the smallest Japanese coin consists of a few rin pieces, the equivalent of one-quarter of an American penny.

The currency media is composed of paper notes, silver, nickel and copper. The Japs have their paper money in one, five, ten yen notes and upward. The silver money comes in ten, twenty and fifty sen pieces. The smallest nickel piece is valued at five sen. These are valued at 2 sen, 1 sen and 5 rin.

This is the substance of the entire currency system in Japan when you step into a money changer to procure the coin of the realm. But it does not always obtain the equivalent in value for your American currency. The various export towns aware with Chinese money changes. These Mongolian financiers deduct a rate of from 1 to 2 per cent for every \$10 in American money exchanged.

It is not to be taken the denials of Japan, away from the beaten track of the world's commerce. The Japanese pay even a higher rate of exchange, as the Jap merchants refuse to accept foreign money. They will take the yen, unless they are easily accessible to some nearby export town.

The Japanese pay even a higher rate of exchange, as the Jap merchants refuse to accept foreign money. They will take the yen, unless they are easily accessible to some nearby export town.

HER MISSING NECKLACE.

Saint-Hilaire Finally Avails and Resolves to Go to the Hills.
The innocent ignorance of much engaged men of science as to ordinary things has been the cause of a amusing anecdote of Geoffrey Saint-Hilaire the younger. Saint-Hilaire was accustomed to wear a diamond necklace, which he did not allow the affairs of his business to disturb him, and Saint-Hilaire was careful to guard him against all worry of domestic matters.

In his private life he was accustomed, being a naturalist, to have various strange animals, after the fashion of Rossini. Of these and money was his favorite. His wife possessed a necklace of diamonds, which she had naturally proud. One day this necklace was missing. Madame was in despair, and she went home searching, with the exception of Saint-Hilaire's room. She knew his habits of being distracted, and moreover she had not entered this room for a long time, so that she could not have left the diamonds there.

A few days later at one of Mrs. Saint-Hilaire's "at home" her husband appeared, and a woman among the guests who supposed he knew of the disappearance of the diamonds asked him if they had been found.

"What diamonds?" he asked. He called his wife and money was his favorite. His wife possessed a necklace of diamonds, which she had naturally proud. One day this necklace was missing. Madame was in despair, and she went home searching, with the exception of Saint-Hilaire's room. She knew his habits of being distracted, and moreover she had not entered this room for a long time, so that she could not have left the diamonds there.

Farmers to Enter The Federal Arena

Winnipeg.—The Canadian Council of Agriculture, which has been in session here, concluded its business by announcing to the public its decision to enter the field of Dominion politics, and calling a conference of representatives of the farmer organizations of three prairie provinces and Ontario, for the purpose of the co-ordination of effort to secure the election to the federal parliament of supporters of the new national policy of the country.

In preparation for this event, the platform which was issued a year ago has been revised and brought up to date by the addition of planks calling for the federal election to be placed on a political basis and nationalization only.

The decision in regard to the call of a conference was only reached after a day and a half's debate. The principal point of discussion was if it should be composed of representatives of all the provinces or of only those where there was a working farmers' organization.

A proposition had been submitted by J. B. Musselman, that it should be open to delegates from all farmer organizations in the various provinces, which had for their main object the support of the farmers' platform, but eventually the main resolution was adopted.

The full text of the resolution was as follows:

"Whereas the new national policy advocated in the platform of the Canadian Council of Agriculture is based upon the broad national economic interests of Canada, without respect to any particular class or occupation;

"And whereas a political organization has been promoted within the provincial bounds of Alberta, Saskatchewan, Manitoba and Ontario;

"And whereas conditions now demand the better co-ordination of the political effort of the organized supporters of the national policy of the Dominion Government;

"Be it resolved, that the executive of the Canadian Council of Agriculture be instructed to invite representation from the provinces named herein to a conference for the consideration of these matters."

During the consideration of the national platform, the clause calling for the immediate repeal of the War Time Elections Act was eliminated. The Act having passed out of existence on August 1, and the following substituted:

"That the new Dominion Elections Act shall be based on the principles of establishing the federal electorate on the provincial franchise, thus providing for giving votes for women in the federal elections." The following addition was made to the platform:

"We recommend that the federal Act based on personal nationalization only."

Child Burned to Death

Hamilton.—Daisy Bowbank, six years of age, was fatally burned here yesterday when she was away from her mother for a few moments to take the laundry. The child got possession of a kerosene lamp, which set her nightgown on fire.

U. S. Government Gathering in Reds

Centra.—Cities of western Washington joined Centra, in availing members of the Industrial Workers of the World and raising their headquarters, following the firing on an American. Day parade here, four former United States soldiers are dead and a fifth is reported dying as a result of the shooting, and one alleged I.W.W. has been killed.

Twenty-two men and one woman, reported to have radical beliefs, were placed in jail here, and later four of the prisoners, including the woman, were removed to the Lewis county jail at Chehalis by national guardsmen, who patrolled Centra. Four were conducted at Seattle, Tacoma and Aberdeen in the I.W.W. headquarters.

In Seattle, fourteen men and one woman, according to the police, were taken to police headquarters. The Tacoma police arrested thirty-four members of the I.W.W. and seized a quantity of radical literature.

At Aberdeen, large quantities of literature and the records of the Aberdeen local of the organization were taken.

Two Killed in Aeroplane Accident

Victory Loan Aeroplane Dashed to Ground Near Egawville

Egawville.—Harry C. Dobbin, pilot formerly of Lantz Camp, Toronto, and James F. Munro, of Pembroke, were both instantly killed when their Victory Loan airplane dashed to the ground in Reeves field on the outskirts of Egawville. Owing to the heavy fog at the time there were no witnesses to the accident, although the machine was plainly heard crashing the town, it having left literature on the way, and was seen flying low near Egawville.

The bodies of the men were badly bruised about the head and legs and the machine was completely wrecked. James F. Munro was a prominent business man of Pembroke and a former Liberal candidate.

Harry Dobbin and his twin brother, Fred, who were natives of Moose Jaw, have been engaged in an airplane company enterprise in the East and had met with success. Both had seen service overseas and had been sent back as "stunt" instructors at Armour Heights, Toronto.

Police Raid Seattle Paper

Editor and Several Employees Are Seized, Together With the Entire Plant

Seattle, Wash.—Federal officers raided the office of the Seattle Union Record and seized the plant and several employees. E. Ball, the editor, among them.

United States District Attorney Robert S. Sanders said the office was raided on instructions from Washington, D.C.

The Record editorially said the holding at Centra was "the result of a long series of illegal acts by a few former soldiers themselves."

Improvement in Wilson's Health

Washington.—President Wilson, in a cablegram to Queen Mother Alexandra of Greece, said he was happy to say that his health was steadily improving.

His message was in reply to one from the Queen thanking him for relieving her grandson, the Prince of Wales, and expressing the hope that his rest would give him fresh strength and health for the future.

House of Lords Rejects Women

London.—The House of Lords rejected the clause in the Bill for the removal of sex disqualifications, which would permit women to sit in the House of Lords. The clause, in the form of an amendment, was added to the Bill by the House of Commons on October 27.

Smallpox Cases in Ontario

Toronto.—The medical health officer reports 263 cases of smallpox in Ontario, an increase of 36 cases and 878 exposed persons under quarantine.

The provincial health department reports 133 cases outside of Toronto.

Premier Drury Has Announced His Government

W. F. Nickle, K.C., Has Been Offered the Portfolio of Attorney-General

Toronto.—Premier Drury announced that E. H. Grant, member-elect for Carlton, had accepted the portfolio of education in the Ontario cabinet now being formed. Mr. Drury also stated that he had wired W. F. Nickle, K.C., of Kingston, offering him the portfolio of attorney-general.

The Premier's cabinet, which is regarded as the official mouthpiece of the premier, gives the following list of the new cabinet:

Premier, C. Drury; minister of agriculture, Manning; education, R. H. Grant; lands and forests, Benish Duggan; public works, C. H. Hays; labor and trade, W. R. Rolfe; mines, H. Mills; provincial secretary, C. Nixon; attorney-general, W. F. Nickle.

Without portfolio, Hon. Col. D. Gurniback, D.S.O.

War Board On The Car Shortage

Railway War Board Issues Statement Dealing With Handling of Coal and Feed

Winnipeg.—Owing to unusual conditions through the West, the Western branch of the Railway War Board issued this statement:

"The demands made upon the railways equipment and facilities in the Western Canada during the past two or three weeks have rarely been exceeded. This is due to a variety of causes. In the first place, owing to the three months' strike in the Western Canada mines, many point feed the public provision were caught by the early coming in of winter, practically without any coal whatever, and the sudden reverse of the situation has created an unprecedented demand for coal. The tonnage of western coal being handled to Manitoba and Saskatchewan is tremendously greater than has been handled in previous years, and this means a heavy movement in the same direction with grain and stock, and the handling of thousands of empty cars west of the mines. This coal is a large export formerly sent to the grain exporters returning from the lake head, but the shortage of American anthracite this year and the greater reliance on western coal has now led for domestic purposes has caused an enormous increase in the movement from the western mines, and the handling of the railways correspondingly increased burden."

"The dry season in Southern Alberta and Southern Saskatchewan, resulting in a large section of stock-raising territory being denied of feed, has caused an extraordinary heavy movement of stock from these sections to the markets, as well as a large movement from these sections to portions of northern Alberta and Saskatchewan."

"It is unlikely that such a heavy movement of stock will be maintained in the future, and the railways are also being called upon to handle thousands of cars of feed in regular quantities, which are not handled in ordinary years. The heavy snowfalls made it necessary that this stock be moved quickly, and it has been necessary, suffering, and the railways are exerting every effort to accomplish this."

"The severe weather, resulting as it has in a shortage of feed and other farm work, has been followed by heavy increases in grain handling, and the railways are meeting the demand for increased exportation of wheat, has added to the burdens of the railways."

"As a result of the shortage of cars in the United States has made it exceedingly difficult to secure return of Canadian cars going into the States, and this has been particularly the case in connection with stock cars. In order to expedite the stock movement, the railways have been forced to furnish box cars for local stock movement, on the basis of two box cars to handle the number of animals ordinarily handled in one stock car, which has resulted in the supply of box cars for other purposes."

"In addition to all this the severe weather and heavy snowstorms have necessarily slowed up the movement of traffic to some extent and has increased with the distribution of supplies through the necessary using engines to operate snowplows instead of hauling trains of engines."

"Preference in car supply and movement is being given to fuel, feed and stock, and every possible effort is being put forth by the railways to relieve the situation as speedily as possible. It is right, however, that the public should be informed as to the conditions under which the railways are operating?"

Sinn Fein M.P.'s in Court

Members of British House Sentenced to Two Months' Imprisonment

London.—The Sinn Fein members of the British House of Commons were sentenced to two months' imprisonment on the charge of participating in forbidden proceedings. They refused to recognize the court, and each member was sentenced to two months' imprisonment.

Among those arrested were John Mahoney, John Hayes, and Frank James.

Starts Flight to Australia

London.—Captain Ross, a British aviator, has left the House of Commons in an attempt to fly to Australia. Captain Ross has been seen from the Cape to the Cape, and is expected to land in Australia, and later from Cairo to Karachi, British India.

Cabinet and Irish Question

British Government Is Much Embarrassed by Publication of Plan for Settlement

London.—The cabinet is about to take up consideration of the proposals of the cabinet committee on the subject of Ireland.

It was learned from authoritative sources that the government was much embarrassed by the publication of what is purported to be the government plan for the settlement of the Irish question. The Associated Press is officially informed that all stories hitherto printed are necessarily speculation and incorrect, because the government has not yet formulated its proposals and cannot until the committee's report is considered.

Rumania's Reply Unsatisfactory

Paris.—The reply of Rumania to the allied note recently presented in which it was again demanded that Hungary be evacuated is regarded as unsatisfactory. The note, which was taken up for consideration in the peace conference, was characterized as extremely vague.

Malaita Good Roads

Winnipeg.—During the past week applications for road work under the Good Roads Act have been approved to the amount of more than \$1,000,000.

Quebec's Premier May Resign

Sir Lomer Gouin Is Leaving for Europe After Session, and May Retire First

Quebec.—With the announcement by the Quebec government that the next session of the government will open on December 10 came the renewal of rumors that Sir Lomer Gouin had announced his resignation. It is generally conceded here, even by the Liberals, that Sir Lomer Gouin will shortly resign from leadership of the province of Quebec, but whether or not he told his cabinet when he would withdraw was not divulged by any of the members.

When spoken to by newspapermen and asked directly if there was any truth in the story of his resignation, the premier is said to have replied: "No, the session has been called."

It is known that Sir Lomer is leaving for Europe after the session, and he may resign before he leaves. Rumors also announce that he will be succeeded by Hon. J. E. Caron, minister of finance.

Referendum Probable

In Manitoba

Liquor Action Will Not Be Taken Up at Same Time as Elections

Winnipeg.—As soon as peace is officially signed, the importation of liquor into Manitoba will be legal, according to the statement of J. N. McLean, administrator of the Manitoba Temperance Act, announced here.

He stated he found a clause in the Act which can be invoked to prevent export of liquor from this province. The clause will be the subject of a provincial government, Hon. Mr. Brown stated that it is their desire to have the people express their views in regard to referendum.

It is unlikely that such a referendum will be submitted at the time of the elections next summer as the time might becloud party platforms.

Lost at Sea

Two of the Crew of H.M.S. Renown, Sighted Overboard

New York.—William McLaughlin and John Laight, able-bodied seamen of the crew of the British battle cruiser Renown, were lost at sea when the Renown, passing through a gale, was coming here from Trinidad to take the Prince of Wales home.

Midshipman Richard Knight was taken from the big battle cruiser, which was broken as the result of tempestuous weather. Knight was a short, stout runner into the gale, Midshipman Knight, with a crew of four, hastened to make fast one of the floating gear.

While they were working, a heavy sea swept over the bows and jammed them against the breakers, forcing them to abandon their work and carrying Laight overboard.

A lifeboat was lowered, manned by a crew of fourteen. As this boat reached the water it was captured by another huge wave and its occupants were thrown into the sea. General quarters were sounded and a search party was organized.

Two of the crew of the first lifeboat except Franklin were rescued.

Austria Granted Credit

Copenhagen.—The extent has granted a credit of \$40,000,000 to Austria, according to the Vienna Tageblatt. This will be utilized principally for the purchase of raw materials.

Miners Will Now Accept Court Ruling

Indianapolis.—The United Mine Workers of America, contrary to previous announcement, has decided to withhold the appeal to the ruling of the federal court in injunction proceedings, which resulted in the call of the strike of miners.

It had been generally believed that, regardless of developments in the situation, the miners would fight the case in the courts to the last ditch and attorneys for the coal workers announced that their appeal would be presented within ten days.

However, Henry Warrum, chief counsel for the Mine Workers' organization, stated that the outcome of the case in the courts is not a card for them. The miners' court has thirty days in which to file the appeal.

The decision of the miners is taken to indicate that they have accepted the government's assurance that the suit against the miners was not a work.

Increased Pay

New Rates Are Effective as From May 1 Last, When Negotiations Were Opened

Montreal.—It is announced by the Canadian Railway War Board that an agreement providing for increases in rates of pay and certain changes in working conditions was signed by the board, acting on behalf of the railways concerned, and by the officials of Division No. 4, railway employees' department, American Federation of Labor, which includes in its membership Canadian railway employees engaged in locomotive and car departments.

The agreement was signed on behalf of the board by chairman J. H. Macdonald, its administrative committee, Grant Hall, and for the employees by Messrs. K. J. Talbot, Frank McKenna and Charles Dickey, president, chief president and secretary respectively of the labor organizations.

Negotiations which culminated in the agreement commenced were commenced in May last. The employees asked for a general increase of 17 cents an hour. The new agreement provides for four cents an hour to men engaged in locomotive work and nine cents an hour for those engaged in the car repair shops. These rates will be effective as from May 1 last. Changes in rates pertaining to working conditions go into effect on the first of June.

Negotiations which culminated in the agreement commenced were commenced in May last. The employees asked for a general increase of 17 cents an hour. The new agreement provides for four cents an hour to men engaged in locomotive work and nine cents an hour for those engaged in the car repair shops. These rates will be effective as from May 1 last. Changes in rates pertaining to working conditions go into effect on the first of June.

Viscount Grey

May Recover Sight

Washington Specialists Diagnosed Cause in an Abscessed Tooth

Hallux, N.S.—The Canadian Press learns on the most reliable authority (a passenger on one of the big liners coming here) that the cause for the blindness of which Viscount Grey, British ambassador to Washington, is afflicted, has been diagnosed by an eminent United States specialist, Dr. J. H. Doherty. The origin of the affliction is said to have been found in an abscessed tooth, which has impaired the optic nerve.

Viscount Grey, it will be recalled, was obliged to withdraw from political life on account of this affliction. It was only in recent days that principle alone in the appointment that he accepted temporarily the position of ambassador.

It is believed that the cause of blindness does not come too late, and it is even believed that his sight may be fully recovered.

White Sugar Coming

Winnipeg.—While wholesale sugar prices are high, the public must get on with brown sugar owing to the scarcity of the white, they still assert that the good granulated is being sent overseas to the bounties.

Bulgaria to Sign Peace Treaty

Paris.—The peace conference has received information that the Bulgarian government has decided to accept and sign the treaty as presented to the Bulgarian delegation.

Yudenitch Still in Grave Position

Washington.—Despite the repulse of Bolshevik attacks on both banks of his line, Gen. Yudenitch, commanding the anti-Bolshevik forces in Russia, still is in a most critical situation, according to official "advisers."

Evacuation of Yankov was reported, and it was said that the Bolshevik forces—probably released by inactivity on other fronts, were approaching the line of the Tzari.

Miners Will Now Accept Court Ruling

Indianapolis.—The United Mine Workers of America, contrary to previous announcement, has decided to withhold the appeal to the ruling of the federal court in injunction proceedings, which resulted in the call of the strike of miners.

It had been generally believed that, regardless of developments in the situation, the miners would fight the case in the courts to the last ditch and attorneys for the coal workers announced that their appeal would be presented within ten days.
